

Welcome To The Trusted Cloud

Secure Cloud and Workload Management for Modern IT

Apcera is the world's only trust-first cloud platform, offering fine-grained security services and pervasive policy linked with enforcement. Apcera is designed to meet the needs of the modern enterprise that requires both agile application development and robust governance.

"Apcera is allowing us to develop faster, develop more specifically and focus on the things that our customers want today."

nextSource CEO Catherine Candland

RUN YESTERDAY'S WORKLOADS ANYWHERE
APPLICATION MODERNIZATION

SECURELY DEPLOY DOCKER & MICROSERVICES
MODERN ARCHITECTURES

DESIGN ONCE, RUN ANYWHERE
HYBRID-CLOUD MOBILITY

GAIN TRUSTED CONTROL OF THE CLOUD
POLICY-DRIVEN GOVERNANCE

Apcera provides full support for today's latest development methodologies, including:

Supported Infrastructure:

Community Edition

The perfect way to explore modern application architectures or lightweight production apps. Anybody with a laptop or a small amount of cloud resources can set up a full compute cluster in minutes, instead of days or weeks. The Apcera Platform Community Edition is built from our robust platform and policy engine, but in a lightweight (and free!) package.

Enterprise Edition

Our full suite of solutions that easily deploy, orchestrate and govern the workloads of even the most demanding organizations. Features exclusive to Enterprise Edition:

- ✓ Enterprise-grade identity management support
- ✓ Distributed infrastructure and hybrid cloud support
- ✓ High availability
- ✓ High-throughput load balancing
- ✓ Dedicated customer support

See reverse for more details or visit www.apcera.com/comparison

Ready to transform your organization with the most secure and trusted cloud platform?
