THE NIRVANA OF COMPUTE
Your Guide to DockerCon Seattle 2016

The Nirvana of Compute: Your Guide to DockerCon Seattle 2016
We love Seattle, and we really love the way Docker is enabling companies to develop and scale their next-gen containerized applications. That's why we're so excited to be attending DockerCon Seattle 2016 on June 19-21.

As our Chief Strategy Officer, Mark Thiele, says, "Apcera and Docker is the ideal state... it's the Nirvana of Compute!" So naturally we'll be at DockerCon with product demonstrations, awesome swag, a killer ecosystem talk and a local Apcerian tour guide.

'Come as you are' and meet us there!

Webinar
Secure and Govern Applications and
Infrastructure Through Policy

Jim Reno
Chief Security Architect, Apcera

Did You Miss the Webinar on Security and Governance Through Policy?
Watch the Recording On Demand
IT doesn't just support the business, IT is the business. That's why it's critical to address GRC (governance, risk and compliance) and security holistically—and policy is one of the best ways to address these concerns across the enterprise.
If you missed the webinar, you can still hear from Jim Reno, Chief Security Architect at Apcera, and learn how policy can secure and govern your applications and infrastructure in the rapidly evolving world of modern IT.

Why Apcera Joined the
Cloud Native Computing Foundation

Why Apcera Joined the Cloud Native Computing Foundation
The Cloud Native Computing Foundation is a Linux Foundation initiative whose goal is to write the manual on "how clouds should be architected to serve modern applications." The foundation's aim is to create a collaborative forum devoted to advancing container technology.

Read an interview with our CEO and founder, Derek Collison, where he explains why Apcera supports the CNCF, and why the foundation is so important—not just to Apcera but to the entire tech community.
